

# INOSYS LBS UL 98B

Load Break Switches for DC & PV applications  
from 100 to 1200 A, up to 1500 VDC

## The solution for

- > Industry

## Strong points

- > High performance power switching in a compact frame
- > Safe & reliable operation
- > Designed for harsh environments
- > Easy to install
- > Modular solution for flexible configuration

## Conformity to standards

- > UL 98B  
Guide WHVA  
File E346418

- > IEC 60947-3,  
DC-21B & DC-PV2

- > CCC

## Function

INOSYS LBS is a range of load break switches that can be manually controlled. These switches can be operated manually using the handle to disconnect all or part of the electrical installation. They ensure on-load opening / closing and safe disconnection of any direct current low voltage electrical circuit up to 1500 VDC. They can also be used for emergency power switching applications. They are available for DC-PV2 utilization category.

## Advantages

### High-performance switching in a compact frame

INOSYS LBS load break switches incorporate patented technology that provides a breaking capacity of 750 VDC per pole, providing 1500 VDC in just 2 poles, and significantly limiting power dissipation. All in an exceptionally compact device.

### Safe & reliable operation

- Direct position indication on the bar and visible contact with containment of the electrical arc.
- The opening and closing of the switch is fully independent from the speed of operation, ensuring safe operation under all conditions.
- High temperature withstand: no derating up to 131° F (55 °C), functional from -40 to +122 °F (-40 to +50 °C).

### Modular solution for flexible configuration

- Single or dual polarity switching
- The same switch can be used for installation with either grounded or floating networks by choosing the wiring configuration.

### Designed for harsh environments

- Vibration testing (from 13.2 to 100 Hz at 0.7 g).
- Shock testing (15 g during three cycles).
- Humid temperature testing (2 cycles, 131°F/55°C with 95% humidity level).
- Salt mist testing (3 cycles with humidity storage, 104°F/40°C, 93% humidity after each cycle).

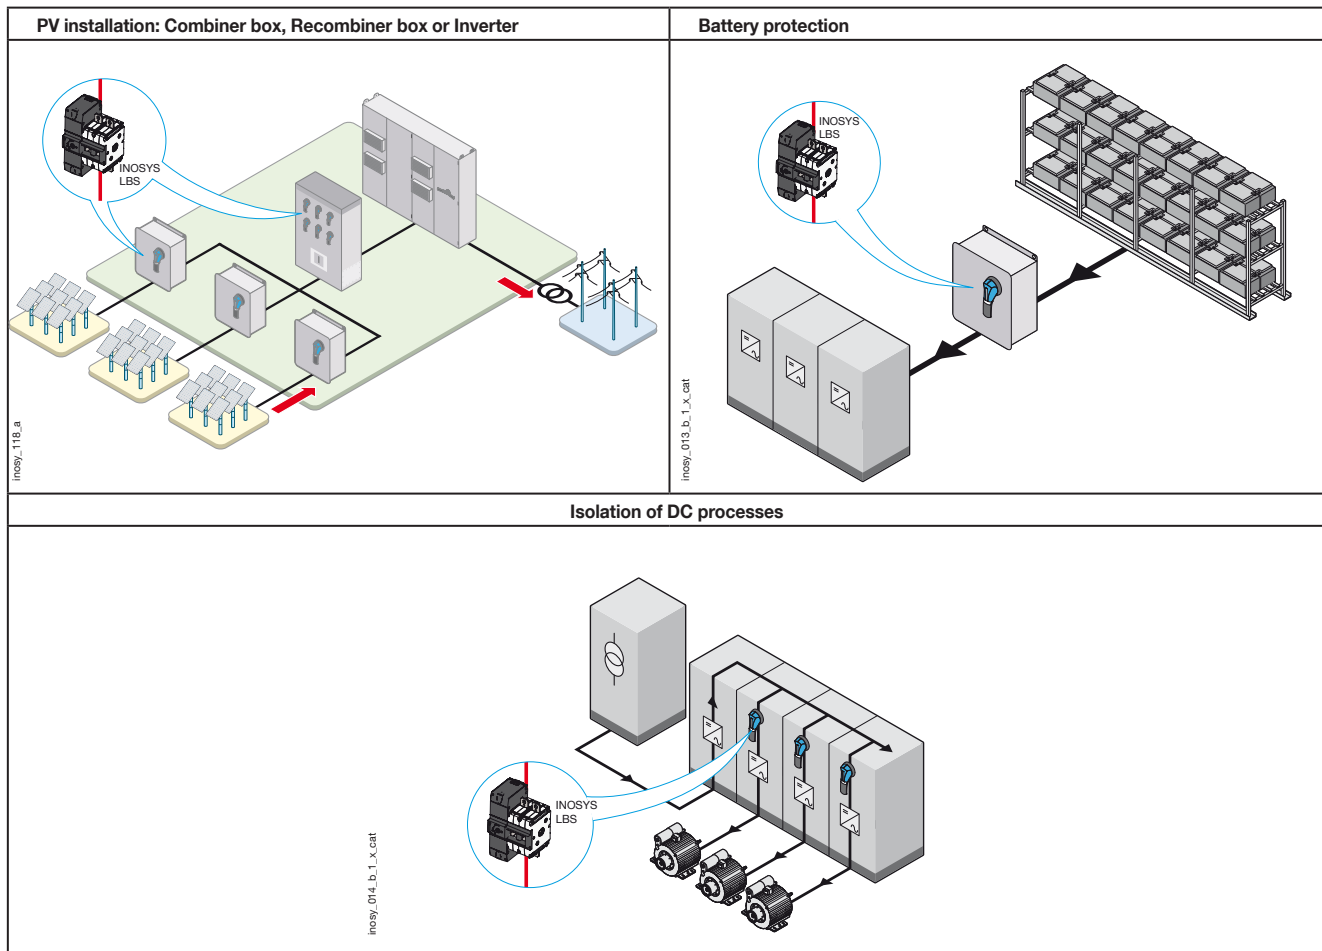

### Easy to install

- Wiring: as the switch is non-polarized all types of wiring and connections are possible.
- Easy access without tools to integrate auxiliary contacts (located within the switch footprint).
- Mechanism can be centred or left aligned (in the factory) to accommodate installation requirements.

## General characteristics

- Range from 100A to 1200A.
- Up to 1500 VDC.
- High-performance switching in a compact design.
- Easy integration.
- Reinforced safety with visible contact indication.
- Efficient with low power-loss.

Typical applications: local safe disconnection for DC and PV applications

F2	E2	Red	8499 <b>5023</b>
F3	E3	Black	8499 <b>5032</b>

E3 handle

access\_400\_a\_1\_cat

Door interlocked external operation handle

Use

Door interlocked external operation handles include an escutcheon and are padlockable. External handles must be utilized with an extension shaft.

Example

As the handle is interlocked in the "ON" position the operator must safely disconnect and isolate the circuit prior to accessing the panel for maintenance procedures. Opening the door when the switch is in the "ON" position can only be done by defeating the interlocking function with the use of a dedicated tool (authorized personnel only). The interlocking function is restored when the door is re-closed.

S2 type handle

access\_150\_eps

## Bridging bar for poles in series

### Use

The bridging bars enable the poles to be connected in series, allowing the following configurations for 1500 VDC.

### 1000 VDC - 1 circuit

Frame size	Rating (A)	No. of poles	Quantity to be ordered	Reference
F2	100	2 P	1	8409 0016

access\_411\_a\_1\_cat

## Terminal screen

### Use

Provides top and bottom protection against direct contact with terminals or connection parts.

### Advantages

Perforations for thermal checks.  
Assembly requires mounting inserts (provided with terminal screens).

Frame size	No. of poles	Position	Reference <sup>(1)</sup>
F2	2 P	Top and bottom	8499 3222
F2	3 P	Top and bottom	8499 3232
F3	2 P	Top and bottom	8499 3722

<sup>(1)</sup> Each reference comprises 2 terminal screens for top and bottom protection.
